

eManifest Filing Services

for all Carriers & Self Carrying Importers into Canada

The Canada Border Services Agency (CBSA) began implementing the third phase, known as eManifest, of the Advance Commercial Information (ACI) Program on October 31, 2010. When eManifest is fully implemented, carriers, freight forwarders and importers in all modes of transportation will be required to electronically provide CBSA with cargo, conveyance, crew/passenger, secondary and importer data before goods arrive in Canada.

Our U.S. Affiliate, Pacific Customs Brokers Inc. (USA) currently provides eManifest filing services for a number of different carriers/self carrying importers entering the USA and has been doing so since the program's inception in March 2007. Coming soon, ABC Customs Brokers Ltd. will also offer the same eManifest filing services for all carriers and self carrying importers entering into Canada. **Sign up today!**
